CALL FOR PAPERS

Traditional Chinese medicine (TCM) has a history of thousands of years in China with unique theories and clinical solutions for personalized medicine. The development of TCM particularly relies on large-scale clinical cases and big data. Recently, the intelligent processing techniques, such as artificial intelligence, data mining, big data and complex network, have played a vital role in promoting the modernization of TCM. However, how to effectively utilize these technologies to promote the development of TCM research in this artificial intelligence era remains a challenge.

We cordially invite researchers and experts to contribute original research articles as well as reviews on the topic of TCM big data processing and intelligent analysis.

Potential topics include but are not limited to:

- Data mining algorithms or methods for TCM big data.
- Knowledge graph development for TCM big data analysis.
- Network medicine and network pharmacology in TCM.
- Intelligent applications or clinical decision support system of TCM.

Authors can follow the author instructions and submit their manuscripts via the Manuscript System at:

<https://mc03.manuscriptcentral.com/wjtcn>.

Guest Editors

Xuezhong Zhou

Ph.D, Professor
School of Computer and Information
Technology, Beijing Jiaotong University
E-mail: xzzhou@bjtu.edu.cn

Jianxin Chen

Ph.D, Professor
Beijing University of Chinese Medicine
E-mail: cjx@bucm.edu.cn

Xiao Gan

Ph.D, Postdoctoral Research Associate
Center for Complex Networks Research,
Northeastern University
E-mail: x.gan@northeastern.edu

Kuo Yang

Ph.D, Postdoctoral Research Associate
MOE Key Laboratory of
Bioinformatics/Bioinformatics Division,
BNRIST, Department of Automation,
Tsinghua University
E-mail: yangkuo@bjtu.edu.cn

Manuscript Submission

October 30, 2021

Intended publication date

December 30, 2021
